## **Data Retreat Participant Handout**

## **Data Retreat Purpose**

The Data Retreat starts with existing elements, building on what is currently in place. Throughout the retreat, the plan team paints a data picture of the current reality of the district. It answers the question: "Where are we now?"

External analysis focuses on political, economic, social, demographic, educational and technological trends, and forces. It includes examination of national and state educational requirements and mandates. It identifies customers' and stakeholders' needs.

Internal analysis focuses on culture and performance: communication clarity, employee's capabilities and capacities, internal stakeholder groups and their needs, core competencies and strengths, as well as weaknesses.

The analysis of strengths, weaknesses, opportunities, and threats (SWOT) leads to review and possible revision of the vision, mission, core values and goals. It also informs identification of customers and stakeholders and their respective needs and interests.

The product of the retreat is the SWOT analysis that is then shared with all the stakeholder groups represented on the strategic plan team for feedback between the Data Retreat and the Vision Retreat.
